

### Technical Sales Trainee

*Responsibilities:*

The selected individual will spend several months training in the Doylestown, Pennsylvania area in various departments including Quality Control, R&D and the Customer Service Department. We will also provide the necessary sales training to make you successful in selling color dispersions to the coatings, printing ink and plastics industries.

After the training period, this individual will be relocated to a major city within the continental United States as a Technical Sales Representative where he/she will sell and service existing customers and develop sales to new customers. Approximately 30 - 40% travel is required.

This position offers excellent career growth and potential for advancement.

*Qualifications:*

1. Recent college degree (Chemistry, Chemical Engineering or Business preferred).
2. Excellent communication skills, computer competence and organizational ability.
3. Entry-level position, 0 – 2 years of experience required.
