

VARIEGATED

Our Variegated line offers many options ranging from wood-like flow patterns to irregular splashes of striated color, allowing for limitless creative possibilities. This technology, designed for Extrusion Blow molding applications, enables the creation of diverse flow patterns within polyolefins, elevating the aesthetic appeal of your packaging. Whether you want to evoke the natural warmth of wood grains or the dynamic energy of abstract splashes, our Variegated line empowers you to express your brand's personality and storytelling through visually stunning packaging solutions. Choose from our off-the-shelf stylings, each meticulously crafted to offer unique visual textures and captivating designs, or collaborate with our team to create a customized color palette and flow pattern that aligns perfectly with your brand identity.
